DETAILED ACTION

Specification

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

The abstract of the disclosure is objected to because the abstract is replete with grammatical and idiomatic errors. For example, the abstract reads "on the basis of the SPS *fotormat spreadsheets*" when it appears it should read "format spreadsheets." Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

For example, in step (1) of claim 1, applicant uses the limitation "wherein the eight digits file names and three digits extension names consisting of Arabic numerals 0-9 and English letters" when it appears that it should read "wherein the eight digit file

Art Unit: 3663

names and three digit extension names consist of Arabic numerals 0-9 and English letters."

For example, it is unclear what is meant in step (3) of claim 1 in applicant's limitations directed to intermittence signals and record the absolute operating time. It is further unclear what is meant by "the above file names effectively recorded in SPS format ... being on the basis of the former eight digits" in step (4) of claim 1.

The claims are replete with limitations for which there is no antecedent basis. For example, "the eight digit file names" in step (1) of the claim and "the detonating units generating" in step (3) of the claim. As these are the first times these limitations are mentioned, applicant should not use the term "the" in front of these limitations as this implies that, for example, the file name or detonating units are already part of the recited claim limitations.

Claim 1 is further indefinite because applicant uses the limitation "the regulations of the same file names" in step (5) of the claim. It is unclear what is meant by the limitation of "the regulations of the same file names" which applicant places in quotations in the claims. Applicant has not specified or described what these regulations are, and therefore the scope of the claim limitation is indefinite.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
